

This diagram illustrates the exploded view of a mechanical assembly. The components are arranged vertically, showing their relative positions and assembly sequence. Key components and their labels include:

- 23620**: A large, flanged cylindrical component.
- 23939**: A series of four small, flanged rings or spacers.
- 13292**: A small, cylindrical pin or bolt.
- 1**: A long, braided hose or flexible conduit.

The diagram shows the assembly of these components, with the braided hose (1) being connected to the main assembly (23620) via the various rings (23939) and pins (13292).

Exploded view diagram of a faucet assembly. The components are shown in a vertical sequence from top to bottom:

- A curved faucet handle at the top.
- Callout **23620** points to a decorative cap or collar.
- A threaded collar or nut.
- Callout **03116** points to a cylindrical cartridge or stem assembly.
- A large cylindrical body or housing.
- A long, braided flexible supply line.
- Callout **23880** points to the lower end of the braided supply line.
- Callout **13292** points to a small, curved bracket or clip and a small cylindrical pin or plug.
- Below the supply line are several stacked O-rings or seals.
- A large cylindrical body or housing at the bottom, with a curved line indicating a connection point.
- Below the large housing are more stacked O-rings or seals.
